

GRAPHQL SCHEMA

in this GraphQL tutorial, I'll explain exactly what a GraphQL schema is and we need to create one. We'll also start to flesh out an object type (Book) inside the schema file.

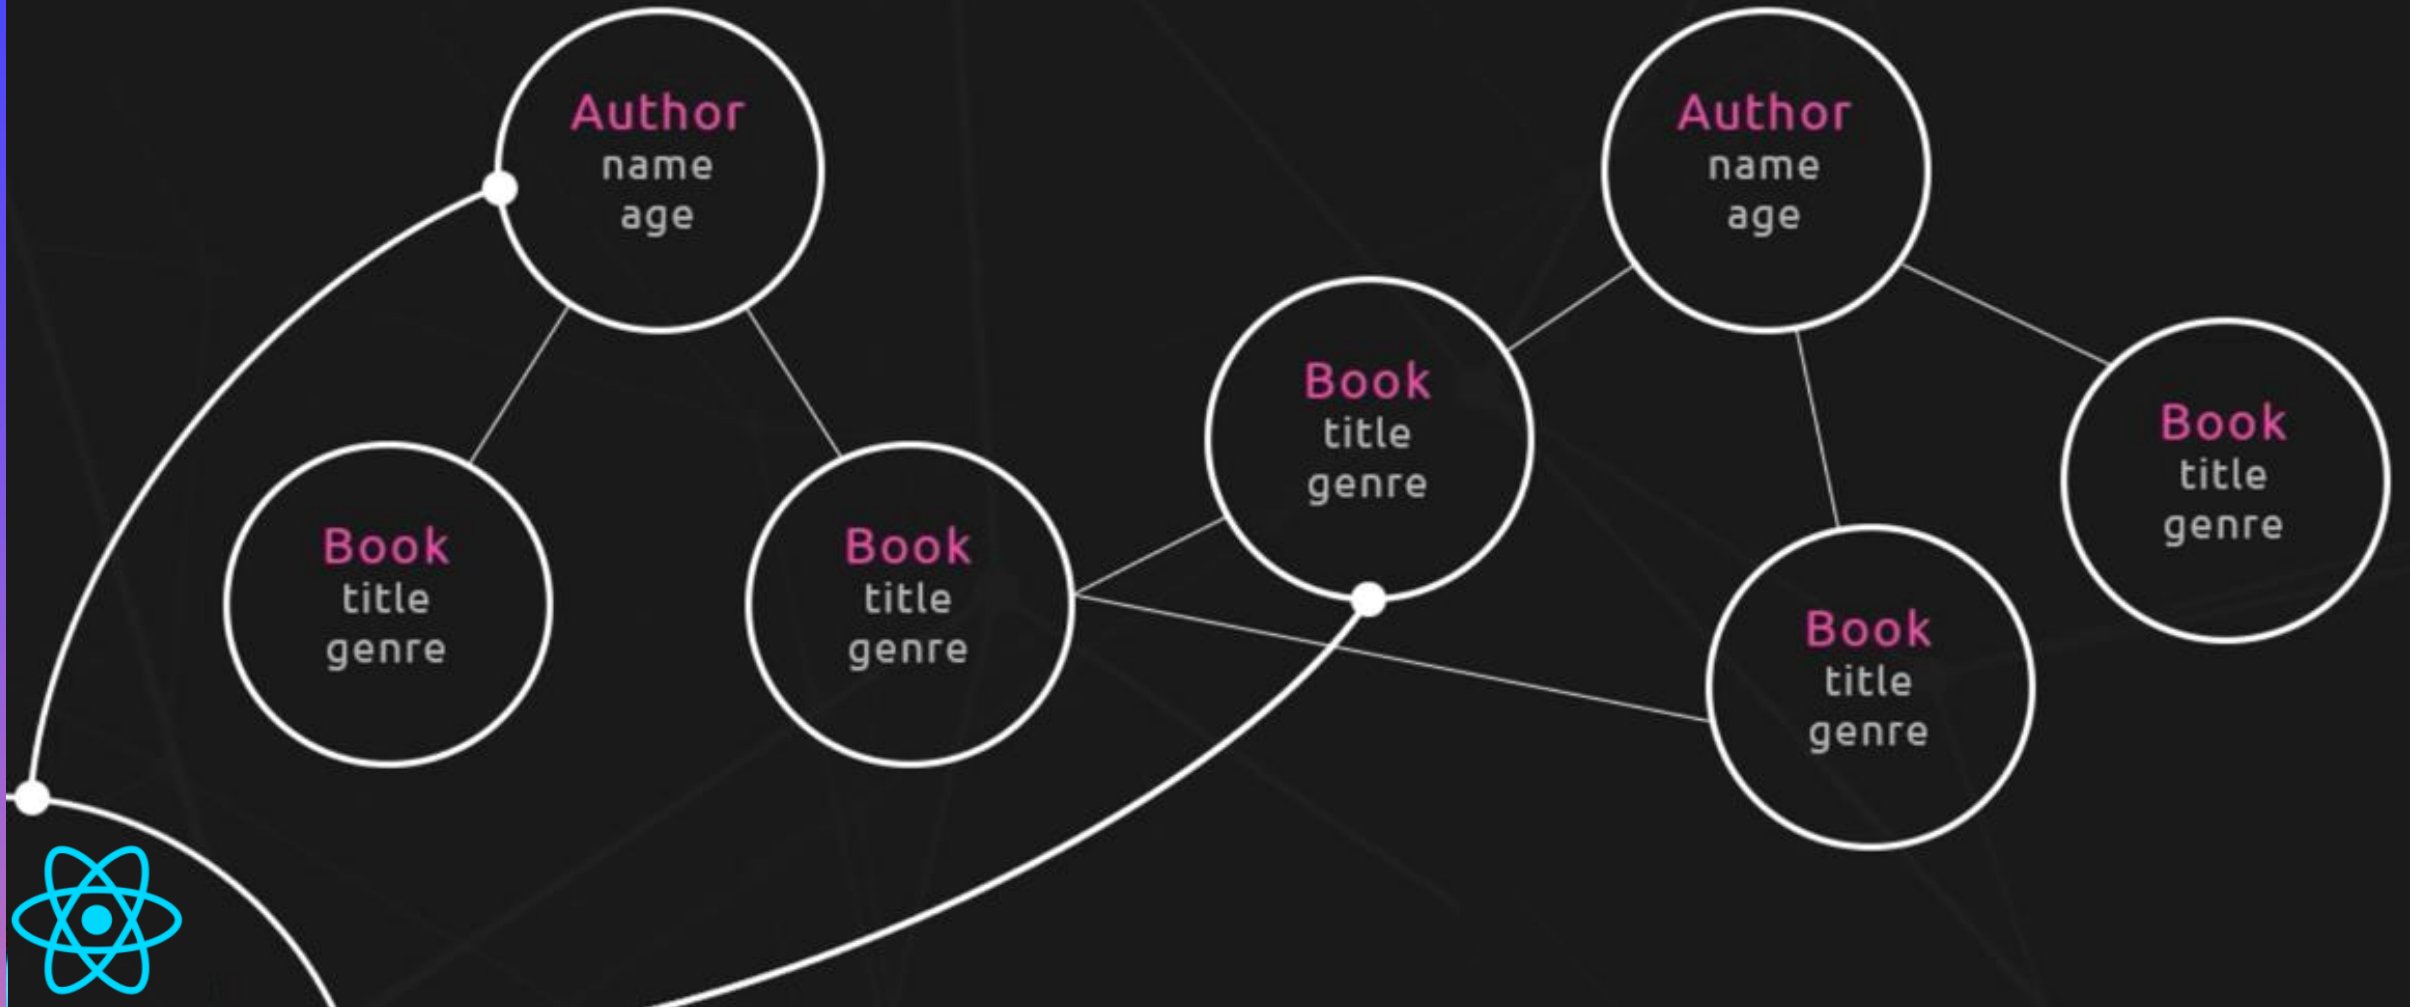

GraphQL Schema

Create folder 'schema' in the folder 'server'

Create file schema.js in the folder 'schema'

Walking the Graph...

schema.js

```
const graphql = require('graphql');

const { GraphQLObjectType, GraphQLString } = graphql;

const BookType = new GraphQLObjectType({
  name: 'Book',
  fields: ( ) => ({
    id: { type: GraphQLString },
    name: { type: GraphQLString },
    genre: { type: GraphQLString }
  })
});
```
